Re: Product Compliance with Food Contact Regulations

There are no statutes or regulations requiring that items that come in contact with food be USDA or FDA approved in order to be used in food preparation or food handling. The USDA and the FDA do not review finished products for compliance nor do these agencies offer acceptance of products for use in food service. Instead, the USDA requires that a supplier provide an end user with a certificate of assurance stating that a product complies with the requirements of the Federal Food, Drug and Cosmetic Act ("FFDCA").

This letter certifies that the product(s) listed below are in full compliance with 21 CFR 177 INDIRECT FOOD ADDITIVES: POLYMERS & Part 110.10 CURRENT GMP IN MANUFACTURING, PACKING OR HOLDING HUMAN FOOD and therefore are safe for use as a food contact material.

Product Name	Item Number
Nitrile Exam Glove 4mil.	N85
Blaze	N48

Do not hesitate to contact me should you have any questions regarding this matter.
