

uvex flashback®.

When protection is your #1 priority.

Exceptional protection and coverage was our #1 priority when designing **uvex flashback®**. Optimal coverage on sides, top, and bottom provides unique, close-to-the-face protection against harmful elements from UV rays to flying particles, delivering superior vision protection.

Next, unparalleled fit and comfort. **flashback's** lens and temple length adjustments ensure an excellent fit. Additionally, the patented **uvex duoflex®** cushions and lightweight frame deliver extra comfort by reducing slippage and pressure behind the ears.

Style and design with strong worker appeal complete the **flashback** priority list. The product's unique styling offers a popular dual-lens look, but it's actually an exclusive single-lens design, allowing for quick and easy lens replacement. Changing the lens is simple, practical, and economical.

When protection, fit, comfort, and style are your priorities, try **flashback!**

Technical Information:

uvex flashback®

Protect workers' vision against ultraviolet rays and flying particles with **flashback**. Its close-to-the-face coverage on all sides offers safety that's unmatched among most other protective eyewear.

Look what you get with **flashback**: fit, comfort, style, and most of all protection.

You'll also find that workers put on **flashback** spectacles and keep them on, all day long, because the product's unique comfort features encourage long-term use. Its styling has wide appeal. And its adjustability provides a customized, comfortable fit for all.

To suit the look users prefer, **uvex flashback** is available in a choice of several stylish frame colors, such as burgundy, black, and gunmetal gray. Lens tint choices include clear, gray, amber, mirror, and welding shades 2.0, 3.0, and 5.0.

Soft, patented **duoflex**® comfort cushions minimize pressure behind the ear and reduce slippage.

uvex flashback, polycarbonate lenses protect from > 99.9% harmful ultraviolet rays.

Molded-in sideshields and browguards protect the eyes from virtually any angle — providing excellent coverage.

Unique, flexible adjustments for temple length and lens inclination provide a custom fit for nearly everyone.

The revolutionary single-lens design means replacing the impact-resistant polycarbonate lens is incredibly quick and easy. So if you need to replace a lens or change lens tints because of changing lighting or work applications, it's a snap.

Choose the protective lens coating that suits your work environment. With **uvex flashback**, all lens tints are available with the **uvex** exclusive **ultradura**® anti-scratch hardcoat; clear and gray lenses are available with the proprietary **4C+**® anti-fog, anti-scratch, anti-static, and anti-UV coating.
