

**No. 6380 STRETCHER BRIDLE** — Constructed with MILLER 1" yellow nylon webbing. A 4" steel ring forms the adjusting and suspension component. At the end of each of the four legs is a galvanized snap with a 3/4" throat opening. Snaps are sewn to the bridle legs with heavy duty nylon thread. Maximum capacity 750 lbs.

The legs of the MILLER bridle adjust so that the stretcher can be carried in any position from horizontal to vertical.
